Harmony is deeply embedded in Chinese culture. Throughout China's ancient, inclusive civilization, the cosmological principle of harmony between humanity and heaven, the worldview of seeking harmony among all nations, and the social ideal of harmony without uniformity have been a constant feature, and every ethical value has been consistently reinforced by harmonious and benevolent minds. The values of peace, concord, and harmony were etched in the Chinese cultural genes and passed down through the ages and throughout the lands, forming the intangible foundation of China's uninterrupted civilization. The current exhibition is organized in four sections and features more than 308 precious artifacts from the collections of the two museums, including ancient Chinese bronzes, gold and silver, porcelain, jades, furniture, paintings, calligraphic works, and books. Highlighting the philosophy of Harmonious Co-existence, which is deeply rooted in Chinese history, it elaborates on the ideas embedded in Chinese civilization of benevolence, people-centered orientation, good faith, justice, harmony, and unity in diversity, as well as their materialization.

The huge volume and rich diversity of NMC's collections impose big challenges to the cultural heritage conservation workers, as the NMC's collections include both ancient cultural relics and contemporary cultural artifacts that bespeak Chinese people's unremitting courage and growth in the past century. Now with more than 70 years of development since the founding of the People's Republic of China, NMC continues to invest in preservation of cultural relics, with a focus on the integration of traditional craftsmanship and modern technologies. With the five sections of "Pioneering Work," "Exquisite Craftmanship," "Outstanding Achievements," "Aiming Far with Devotion," and "Future Lies in the Past," the current exhibition not only showcases the progressive development of the conservation concepts and technologies, but also presents the contributions made by the National Museum of China in the field of cultural heritage preservation in the past 110 years.

From 1921 to 2021, Chinese society has undergone tremendous changes, and so have the living standards and spiritual outlook of the people. The Communist Party of China (CPC), born at a time of national peril, righteously took up its founding mission of seeking the happiness of the people and the rejuvenation of the nation, and led the Chinese people to overcome obstacles and forge ahead, making glorious achievements that have attracted worldwide attention. The Chinese people have made a great leap from being poorly clothed and fed to being happy and prosperous. The exhibition is divided into two sections, “Years of Suffering” and “A Better Life.” The sculptures depict the miserable fate of the people who suffered so much in the China of old, and vividly portray the happy life of the people who share the prosperity of the new era, revealing that only the CPC can take up the historic mission of fighting for national independence and people’s liberation, and bringing prosperity to the country and happiness to the people. Only the CPC can lead the Chinese people to stand up, become rich and strong, and set the Chinese nation on a magnificent path toward rejuvenation.

风洞是进行空气动力实验最常用、最有效的工具之一，也是大气层内飞行器研究最可靠的实验手段。1958年建成的北京大学直径2.25米低速回流风洞，是中国首座可以同时为航空工业工程和科学研究服务的实验风洞，为中国低速空气动力学实验和航空事业立下了汗马功劳、作出了重大贡献，成为中国航空史上使用时间最久、效率最高、对飞行器低速空气动力特性的设计贡献最大的风洞之一，是新中国成立初期科技自立自强、创新发展的重要见证物。

Wind tunnels are one of the most common and effective tools for aerodynamic experiments, as well as the most reliable experimental means for the study of vehicles in the atmosphere. The low-speed closed-return wind tunnel with a diameter of 2.25 meters constructed at Peking University in 1958 was China's first experimental wind tunnel that could serve both aerospace engineering and scientific research, as well as the only wind tunnel in China capable of conducting aircraft model tests at that time. It became one of the longest-serving, most efficient wind tunnels in the history of Chinese aviation, and made some of the greatest contributions to the design of low-speed aerodynamic characteristics of aircraft. The contraction section, diffusion section and fan cowling of this wind tunnel on display here were all wooden components made by workers of the logistics department of Peking University. They were important witnesses to the self-reliance and innovative development that characterized science and technology in the early years of the founding of the People's Republic of China.

Venue: Gallery S13

至迟在 8000 年前，我们的祖先就在磨制石器的过程中逐渐认识了玉这种美丽的石头。从此，他们剖璞取玉，琢玉成器，创造了独特的玉器艺术。本展览从中选取上自远古、下迄清代的玉器精品，增添了部分鲜有展示的馆内旧藏。向世人呈现玉器所蕴含的高超的制作工艺、鲜明的审美趋向与厚重的文化积淀。

At least 8,000 years ago, our ancestors gradually came to know the beauty of jade through the process of grinding stone tools. Following this discovery, they dissected the uncut pieces of jade, carved the jade into objects and created a unique jade art. This exhibition selects jade objects dating from ancient times to the Qing Dynasty and is bolstered by a number of specimens that are rarely displayed to the public. We hope that every visitor to this special exhibition can feel the national spirit, consciousness, tastes and pursuits contained in the jade, comprehend the splendid national culture on display, and appreciate its unique and enduring charm.
